The Water Cycle and Fertilizer

Question: Do I want to add fertilizer to my water cycle model?

Product Label Information

Your plants are currently growing, but you might like to see them grow more quickly. Fertilizer is a chemical that will improve the growth of plants. Chemical fertilizer is quick and easy to use and generally makes plants grow greener and healthier.

Make a Decision

- 1) Will you choose to add fertilizer to your grass? YES / NO (circle one)
- 2) What are the reasons for your decision?

Cut here--distribute the top half before adding "fertilizer" and the bottom half after

Make Some Sense of It

- 3) What happened to the fertilizer that was added to water cycle models?

- 4) Name and explain the water cycle process(es) that made this possible.

- 5) Would you recommend chemical fertilizer to a friend? Explain.
